PhD PROGRAMME
ECONOMICS, FINANCE AND MANAGEMENT
FOR WHOM?

The doctoral programme at the Collegium of World Economy will appeal to any candidate interested in:
- in-depth knowledge in the field of Economics, Finance and Management
- research skills in their chosen field of research
- cooperation with the most renowned Polish professors

PhD studies will provide knowledge useful for pursuing career in:
- educational sector and research institutes
- business and financial sectors
- government institutions
- international organisations including EU institutions

Students should be able to complete their doctoral thesis within four years of studies. The doctoral programme is designed for Master's degree diploma holders, or equivalent, as well as for beneficiaries of the „Diamentowy Grant” (Diamond Grant).

WHY STUDY WITH US?

The programme is intended to provide its graduates with an in-depth knowledge in the field of Modern Macroeconomics and Contemporary Economic Theories of the Firm as well as research directions in International Economics, International Management and International Finance.

All lectures, workshops and seminars are taught in English by the most renowned Polish professors participating in innovative research and education programmes with strong engagement in international cooperation.

Students will learn how to design research in the field of economic sciences and understand quantitative and qualitative research methods. They will also familiarise themselves with preparation of scientific articles.
