**TOPIC 4. INTRODUCTION. RESEARCH ARTICLE ANALYSIS**

Before writing a research paper it is necessary to familiarise oneself with the concept of scientific discourse. To be able to produce effective research papers it is important to understand the logic and structure of a research paper and know what to write in every part of every section. We will analyze different types of articles, and work out a useful template to follow and apply to your own research paper. We will look into the English expressions that experienced writers use to write clearly and concisely

**SEMINAR 5: 11.00-12.30 Prof. dr. Roma Kriaučiūnienė (Vilnius University)**

**TOPIC 5. DRAFTING AN INTRODUCTORY PART OF THE PAPER**

The introduction is an important part of a research paper as it should answer the questions: what, why, and how. It is meant to set the context for your research work and highlight how it

contributes to the knowledge in your field and builds on previous similar studies. We will analyse and discuss a four-step model of how to write an introduction and perform a practical task by applying the model to your planned research paper.

**SEMINAR 6: 13.00-14.30 Prof. dr. Roma Kriauciūnienė (Vilnius University)**

**TOPIC 6. RESEARCH METHODOLOGY**

Research methodology is an important part of a paper. It should explain your methodological approach, include information about the methods you used to do your research. It should also explain what you did and how you did it, by allowing the readers to assess the reliability and the validity of your research. We will overview the main issues that you have to include in this part: the type of research that you did, how you collected and analysed the data, tools and/or materials you used for your research, and describe the rationale for choosing the research methods. We will look into the academic style, grammar, and vocabulary to be used to express your ideas appropriately.

**Day 3 April 19, 2023**
