

PhD STUDIES COURSE UNIT DESCRIPTION

Name of subject	Field of science, code	Faculty / Center	Department
Solid State Reactions	Chemistry N 003	Faculty of Chemistry and Geosciences, Institute of chemistry	Department of Inorganic Chemistry
Student's workload	Credits	Student's workload	Credits
Lectures		Consultations	
Independent study	7	Seminars	

Course annotation

Solid state reactions; thermodynamics; methods of thermodynamics investigation; electrochemical methods; heterogeneous equilibrium method; thermochemical methods; methods of investigation of mechanisms; diffusion annealing method; kinetics of reactions between metal oxides; fundamentals of kinetics as well as techniques for material characterization: thermal analysis (theory and applications, techniques, interpretation of TG and DTA curves, differential thermal analysis and scanning calorimetry, thermo optics, thermomechanics, thermodilatometry, evolved gas analysis) and investigation of solid state reactions using XRD and SEM methods.
