Subject description
<p>While studying the subject, the doctoral student will expand, deepen and systematize his / her knowledge in the field of quality management by analyzing theories and research in scientific articles and monographs. Doctoral student will form his / her analytical, critical approach and insights related to the level of researched quality management aspects and further research perspectives.</p> <p>The aim of the subject is to deepen and systematize doctoral students' knowledge and skills in the fields of formulation, deepening and application of quality management theory.</p> <p>Tasks:</p> <ul style="list-style-type: none"> • to form an understanding of quality management development trends; • to get acquainted with global topicalities of quality management, the latest international quality standards and models, their application in various business and public sector organizations; • to develop the ability to conceptually apply quality management principles, methods, tools, models and systems to improve the efficiency of organizations. <p>Key topics:</p> <ol style="list-style-type: none"> 1. Development of quality management concepts. 2. Concepts, principles and models of Total Quality Management (TQM). Quality and competitiveness. 3. Quality management methods and tools. 4. International system of quality regulation. Standards, technical regulations and specifications. 5. Quality certification system, types and content of certification. 6. Typology and content of quality, environmental and other management systems. 7. Typology of business processes and quality management. Current Process improvement trends – Robotic Process Automation, Machine Learning, Artificial Intelligence, etc. 8. Supply chain quality management. <p>Study methods:</p> <p>1. Analysis of main and supportive literature (thematic consultations and self studies). During the thematic consultations, the most important topics of the subject are discussed on the basis of the most relevant literature. The main literature (scientific articles) is discussed, its place in the context of the topic is indicated. The most important sources of supplementary literature are indicated. Ways and directions of further independent search of additional literature are discussed. Emphasis is placed on issues related to the topic of the dissertation.</p>

2 Reflective critique of basic research methods of consumer behaviour (paper).
The volume of the paper is up to 20 pages (Times New Roman 12, 1.5 line spacing).

The exam grade consists of:

- answers to the questions asked by the commission 70%
- quality of the paper and comments on its content 30%.
