

Research in Germany

German Research Day

Are you planning on doing research or doing a doctorate in Germany?
Are you looking for collaboration partners at German research institutions and universities?

If so, we invite you to visit the "German Research Day" on April 20th at the Lithuanian Academy of Sciences, Vilnius. The German Academic Exchange Service (DAAD) in collaboration with www.research-in-germany.de and the Lithuanian Academy of Sciences (LMA) are holding this event to offer advice and information about the German research sector and research market.

Lecturers by high-standing German research facilities and research funding organisations e.g. *Deutsche Forschungsgemeinschaft (DFG)*, *Max-Planck-Gesellschaft (MPG)*, *Leibniz-Gemeinschaft (LG)* and *Alexander von Humboldt-Stiftung (AvH)* will give presentations in English/German about their research programmes, support services and scholarship opportunities. The *Baltisch-Deutsches Hochschulkontor (BDHK)* and the *Kontaktbüro Hochschulen Mecklenburg-Vorpommern (KBMV)* will be among these partners. As well as these presentations there will be information desks where you can discuss your ideas and requirements in detail.

Germany is an attractive place both for studying and doing research, especially for young people from all over the world. About 240,000 international students are currently working for a qualification at approximately 370 Universities, Universities of applied sciences and Academies throughout Germany. 25,000 researchers are actively pursuing their goals at German institutions of higher education, and a further 23,000 are currently being supported by German research funding organisations.

Among all the European Countries Germany is number one regarding patent applications. From the 80 German Nobel laureates, 68 achieved success in natural sciences.

April 20th 2013, 11:00 – 17:00
